

MOHAMED ZOUARI

Software Development Engineer

Tunis, Tunisia | (+216) 93 077 051 | mzouai@outlook.com | mohamedzouari.me

SUMMARY

Forward-thinking Software Engineer with background working effectively in a dynamic multi-national enterprise environment. Fluent in Python and Javascript programming languages used to develop software within Cloud based products. Love to work on challenging projects while collaborating with a team. Pay attention to the details.

TECHNICAL SKILLS

Languages: Python, Java, Javascript, C/C++, Shell.

Databases: SQL, Java, Oracle, NoSQL, MongoDB, Redis.

Frameworks & Tools: ReactJs, Celery, RabbitMQ, AWS, NodeJs, NGINX, Nix, Spring boot.

Software Design & Methodologies: Web Services, REST, MVC, MVP, Testing, Agile, KANBAN, SCRUM, TDD.

EXPERIENCE

Infor

Sep 2020 – Present

Software Development Engineer

- Contributed in the design and the implementation of a (Python) CLI utility to manage and generate automatically the deployment workflows as a layer on top of an internal deployment tool. (Currently **the maintainer**) :
 - Designed with a team of experienced cloud developers the new concept of workflow as collection of deployments and test actions associated with a specific AWS deployment environment.
 - Created the configuration files, as an abstraction of deployment action. The CLI uses those template files to generate the deployment workflow.
 - Introduced the use of (boto3), to interact with AWS environments.
 - Results:** Enabled developers to focus on developing and testing rather than deployment details. The team reached a more efficient working cycle.
- Contributed in the enhancement and the creation of new features of an internal platform that manages cloud environments :
 - Updated the API layer (Python Pyramid) and the task processing side (Celery, RabbitMQ, SQLAlchemy).
 - Updated and created UIs views (JavaScript, ReactJs, Ant design).
 - Packaged the application using Nix and deployed it using Infor tools.
- Led a prototype with **Infor Nexus** development team to move the platform mentioned above to be more serverless :
 - Leading a team of 2 developers under the guidance of a vice-president, a manager and a principle site reliability engineer; tracking progress, reviewing pull requests and making demos.
 - Developed and migrated the API layer on top of (AWS API Gateway).
 - Configured (AWS CloudWatch) and (AWS CloudTrail) as logging and monitoring tools for the APIs calls.
 - Results:** Reduced the deployment **cost** by 17%.

Integration Objects

Feb 2020 – Jul 2020

Software Development Engineering Intern

- Designed and implemented a monitoring and management modules for a distributed and large-scale industrial IoT platform:
 - Designed, conducted tests and proof of concepts to validate the advantages of designed solutions.
 - Implemented a microservice to collect and manage remote exposed metrics for industrial distributed IoT devices, using scheduled collection job actions.
 - Set rules to scale up or to scale down running instances on a private cluster
- Created an automated cluster installer (vagrant) to setup a multi-node and multi-machine cluster using a configuration management tool (ansible).

Mar 2021 - Currently Maintaining

The first Tunisian services sharing online platform

- Created a full-stack web platform, to allow users find out services they need and to allow service providers to connect with the community :
 - Designed, and implemented a three-tier architecture for a cross-platform online sharing website.
 - Implemented a responsive front-end UI (ReactJS, Ant Design, Material Design).
 - Deployed a back-end server (NodeJS, ExpressJs), connected with a non relational database (MongoDB).
 - Used a distributed storage cloud solution to host media files.
 - Implemented an authentication and authorization component with email verification.
 - **Results:** Actually Running, with (860 users, and 1540 shared services).
 - *Actually working on adding a service recommendation engine based on services rating and user previous activity.*

2019

A real-time reputation monitoring platform

- Designed and implemented a real time solution for reputation tracking and monitoring on (Twitter) :
 - Designed and implemented a microservices solution.
 - Implemented some back-end microservices using (Spring Cloud).
 - Implemented sentiment analysis microservices and stream processing modules (python).
 - Used Kafka as a message broker to handle stream processing between the different running containers.
 - Used Elasticsearch as a search-engine to save the streams processing results for a realtime dashboard monitoring.
 - **Results:** Deployed the platform on an AWS EC2 instance and tested it 3h before Tunisian Presidential Election results announcements to get a comparison of the reputation of the two candidates near the real results.

EDUCATION

National Engineering School of Tunis, Tunis, Tunisia

Sep 2017 - Jul 2020

M.Sc.CS, Software Engineering

Computer Science engineering degree (M.Sc equivalent) with a major in Software Engineering.

Paris Descartes University, Paris, France

Sep 2020 - Oct 2020

M.Res, Computer Science

Master of research degree M2, Computer Science with a major in Signal Processing.

Preparatory Institute El Manar, Tunis, Tunisia

Sep 2015 - Jun 2017

B.Sc, Mathematics and Physics

Ranked among the top 5% nationwide in the national exam.

EXTERNAL ACTIVITIES

IEEE

Sep 2017 -

Present

Active member

- **Chairman of an IEEE Computer Society Chapter :**
 - Organized training workshops covering competitive programming and web development.
 - Coach for the IEEEExtreme international 24h competitive programming competition.
- Participated in the CEuSYP, Central Europe student and young professional congress held in Serbia in 2019.
- Organized the TSYP 2019, Tunisian student and young professional congress.

ENIT Arts club

Sep 2017 - 2020

Chairman of the board

- Led a university music band as **the violinist** of the group, to participate in events.
- Managed the artistic side of engineering students.
- Organized different arts workshops (painting, music...) and flash-mobs.
